## Overview

Monitor data line activity or connect 2 devices to one RS-232C port! Here is a simple, inexpensive way to TAP into a data line so you can see what's going on with a scope, or monitor a line without interrupting the flow of data. Three DB-25 connectors wired straight through, make tapping into existing RS-232 lines simple and neat. This handy little device can also be used anywhere you would use a Y cable, such as connecting 2 terminals in parallel to one port. All possible combinations of gender connectors and mating hardware. (Please specify genders: MF-M, MF-F, MM-M, MM-F, FF-M, FF-F).

## Features

- All 25 Pins Wired Straight Through to All 3 Connectors
- A Great Way to Monitor Data Line Activity or Connect 2 Devices to One RS-232 Port
- Available in All Gender Combinations
- **Made in the USA** — This Patton equipment is designed by Patton engineers and built in our Gaithersburg, Maryland facility. Patton's American-made manufacturing process delivers high-quality networking solutions with reliability you can trust.

# Ordering

| # | Model # | Description   | Availability  |
|---|---------|---------------|---------------|
| 1 | 3 FF-F  | DATA TAP FF-F | Special Order |
| 2 | 3 FF-M  | DATA-TAP FF-M | Special Order |
| 3 | 3 MF-F  | DATA TAP MF-F | Special Order |
| 4 | 3 MF-M  | DATA TAP MF-M | Special Order |
| 5 | 3 MM-F  | DATA-TAP MM-F | Special Order |
