This Universal RS-232 Protector Guards Synchronous or Asynchronous Systems

Overview

The Patton EPG Model 503S universal surge protector guards any RS-232 system (synchronous or asynchronous) against data loss and hardware damage due to data line transients. There are many data line surge generators: lightning strikes, fluorescent lights, elevator motors, even UPSs. AC protection alone is not enough! The Model 503S diverts harmful data line surges to chassis ground (through either D-shell) before they reach your hardware.

Features

- Protects All 25 Serial Pins on the DB-25 Connector
- Combined Surge Handling Capacity of 15,000 Watts
- Diverts Surges Safely to Chassis Ground through D-Shell Connectors
- **Made in the USA** — This Patton equipment is designed by Patton engineers and built in our Gaithersburg, Maryland facility. Patton's American-made manufacturing process delivers high-quality networking solutions with reliability you can trust.
