LAN/Ethernet Port Protectors

Connect-IT 570R 10/100Base-T Multi-Port Surge Protectors (8 & 16 Ports)

Connect IT

Heavy Duty Cat-5/6 Hub Protection in a Space Saving Rack Mount Panel Format

Overview

Your 100Mhz data network carries an enormous amount of traffic on a daily basis. You can ill afford costly repairs or down-time due to damaged equipment. Yet transient surges can pose a major threat to any Category-5/6 cabling system.

Patton's Model 570-R16 and 580-R16 rack mount Category-5/6 surge protector panels are available in either 8 port or 16 port (input/output) configurations, these protectors will protect sensitive data ports without degrading network performance. The Model 570-R16 is designed for installation at the point of use, while the Model 580-R16 installs at barriers (patch panels, wiring closets, etc.). Both models feature N.E.X.T. ratings of less than -43 dB (worst pair) and insertion loss of less than 0.4 dB. Transient energy on all ports is diverted safely to chassis ground.

Features

- Protect 8 or 16 Twisted Pair Ports with Our 2U (3.5") High x 19" Rack Mount Category-5 Panel
- Guard Twisted Pair Interfaces at Speeds up to 100 Mhz
- EIA/TIA TSB-40A Category-5/6
- Models for use at the Equipment (570) or Barriers (580)
- Near End Cross Talk (NEXT) Better than -43 db for Transparent Protection
- Complies with Transient Immunity Standards IEC 801-2, 801-4 & 801-5
- **Made in the USA** — This Patton equipment is designed by Patton engineers and built in our Gaithersburg, Maryland facility. Patton's American-made manufacturing process delivers high-quality networking solutions with reliability you can trust.
