

# EKI-6332GN

IEEE 802.11b/g/n Wi-Fi AP/Client

## Introduction

The EKI-6332GN is a feature-rich wireless AP/client that provides reliable wireless connectivity for industrial environments. The PoE injector enhances flexibility in deployment of this AP/client, even where DC power availability may be low. As an 802.11n-compliant device, the EKI-6332GN provides data rates six times higher than legacy 802.11a devices. With support for WMM and IGMP snooping protocols, the EKI-6332GN can effectively improve the reliability of wireless connections, especially in applications that require high throughput data transmission. To secure wireless connections, the EKI-6332GN implements the latest encryption technologies including WPA2/WPA/802.1x for powerful security authentication.
