

I-8048/I-8048(G)

8-channel Digital Input with Interrupt Module

Specifications & Features

- Parallel I/O Module
- Digital Input Channels: 8
- Input impedance: $10M\Omega$
- Logic High level:
Isolated: 4V ~30V
Non-Isolated TTL: 2V ~ 5V
- Logic Low level:
Isolated: 0 ~1V
Non-Isolated TTL: 0V~ 0.8V
- Isolation Voltage:2000V
- Built-in isolated power supply:5V,200mA max
- Rising/Falling edge interrupt programmable
- LED indicator for each channel of digital input
- Power Consumption: 0.8W
