IOLAN SDS T

Secure Serial to Ethernet Servers For Extended Temperatures

For serial to Ethernet connectivity applications, the IOLAN SDS T is the most advanced series of device servers available. Delivering high performance in a compact size, an IOLAN SDS T offers extensive security, flexibility and next generation IP technology making it ideal for applications that require remote device/console management, data capture or monitoring in extreme temperature environments.

Secure Serial Connectivity

IOLAN SDS T device servers enable administrators to securely access remote serial console ports on equipment such as PBX, servers, routers, network storage equipment and security appliances through an IP network. Sensitive data such as credit card holder information is protected through standard encryption tools such as Secure Shell (SSH) and Secure Sockets Layer (SSL).

Advanced IP Technology

With support for Next Generation IP (IPv6), an IOLAN SDS T provides organizations with the investment protection today to meet the compatibility needs of networks tomorrow.

Flexible and Reliable Serial to Ethernet Connections

An IOLAN SDS T is ideal for connecting serial based COM port, UDP or TCP socket based applications to remote devices. Perle's TruePort V5 re-director provides fixed TTY or COM ports to serial based applications enabling communication with remote devices connected to Perle device servers either in encrypted or clear text modes. You can also tunnel serial data between devices across an IP network.

Perle's Device Management software provides better centralized control of multiple units resulting in maximum uptime for your remote equipment.

All IOLAN SDS T models have added protection against electrostatic discharges and power surges with robust 15Kv ESD protection circuitry enabling organizations to utilize this solution in the field with confidence.

Class Leading Support and Warranty

Perle IOLAN's are backed by the best service and support in the industry including Perle's unique lifetime warranty. Since 1976 Perle has been providing its customers with networking products that have the highest levels of performance, flexibility and quality.
